

AIVAULT.

— *An AI engineering studio — we build **AI** that actually **ships**.*

We work at the seam between *research-grade models* and *production systems* — from multi-agent pipelines to industrial computer vision deployed in the field.

AIVAULT

BASED

Durham, UK → Hangzhou, CN

STUDIO

Independent AI engineering studio

Small, senior, end-to-end

FOUNDED

Est. 2026

OPEN TO

Product builds · Agent systems · Freelance

FOCUS

Agents · RAG · CV

SHIPPING

EDGE

Jetson · LiDAR

OPEN

We build end-to-end AI systems — models, orchestration, infrastructure, and the product surface on top. AIVault is a small, senior studio taking on select engagements for clients at home and abroad.

Our practice spans *multi-agent orchestration*, retrieval-augmented generation, industrial computer vision, and generative-video production automation. We prefer work where the model has to survive contact with the real world — hardware, users, or both.

MODELS & ML	<i>a</i>	VISION & EDGE	<i>b</i>
LangChain · LlamaIndex		YOLOv8 · OpenCV	
Milvus · FAISS · bge-m3		InsightFace · ArcFace	
vLLM · LM Studio		Livox LiDAR · SLAM	
LoRA · Qwen2.5 · DeepSeek		Jetson Orin NX	
Transformer research		ONNX Runtime	
BACKEND	<i>c</i>	PRODUCT	<i>d</i>
Python · FastAPI		Vue3 · React	
PostgreSQL · Redis		WeChat Mini-Programs	
Docker · Nginx		Seedance · Kling APIs	
Feishu · DingTalk APIs		Claude Code · Codex	
		Agent orchestration

Router *One* — LLM API Gateway

One endpoint for OpenAI, Anthropic, Google, Mistral and more.
Smart routing, real-time cost tracking, automatic failover — and
native support for Claude Code & Codex through a single env var
swap.

LLM GATEWAY • SMART ROUTING • COST TRACKING • CLAUDE CODE • CODEX
