PROFILE · SELECTED WORK · I — V

Tianyu Jiang.

*Independent AI engineer — builds **AI** that actually **ships.***

Working at the seam between ***research-grade models*** and ***production systems*** — from multi-agent pipelines to industrial computer vision deployed in the field.

01 · ABOUT *Who*

I build end-to-end AI systems — models, orchestration, infrastructure, and the product surface on top. I work independently, running a freelance pipeline serving international and domestic clients.

My practice spans *multi-agent orchestration*, retrieval-augmented generation, industrial computer vision, and generative-video production automation. I prefer work where the model has to survive contact with the real world — hardware, users, or both.

02 · STACK *What*

MODELS & ML *a*

LangChain · LlamaIndex

Milvus · FAISS · bge-m3

vLLM · LM Studio

LoRA · Qwen2.5 · DeepSeek

Transformer research

VISION & EDGE *b*

YOLOv8 · OpenCV

InsightFace · ArcFace

Livox LiDAR · SLAM

Jetson Orin NX

ONNX Runtime

BACKEND *c*

Python · FastAPI

PostgreSQL · Redis

Docker · Nginx

Feishu · DingTalk APIs

PRODUCT *d*

Vue3 · React

WeChat Mini-Programs

Seedance · Kling APIs

Claude Code · Codex

Agent orchestration

03 · SELECTED WORK *How*

Featured / LLM · INFRASTRUCTURE / 2026 / *Live at router.one* ↗

Router *One* — LLM API Gateway

One endpoint for OpenAI, Anthropic, Google, Mistral and more. Smart routing, real-time cost tracking, automatic failover — and native support for Claude Code & Codex through a single env var swap.

LLM GATEWAY · SMART ROUTING · COST TRACKING · CLAUDE CODE · CODEX
